

## A QUICK, EASY WAY TO OPTIMIZE THE PERFORMANCE OF YOUR PEOPLE AND YOUR BUSINESS

You know your company has to deliver mission critical learning content to employees. But maybe you don't want the full functionality and cost associated with buying a learning management system (LMS). Instead, you want a trusted, experienced partnership—one that can meet your business's developing needs. ACS has the answer with its business-ready web-based Content Portal, designed to deliver a specific library of learning content directly to your work force. Whether you need easy access to courses to meet your compliance needs, provide technical certification, or increase the performance of your people, ACS has your solution. It's what you need, when you need it.

The ACS Content Portal connects people to designated business content using ACS's easy-to-build and manage, custom, service-oriented, web-based portal so companies can deliver business value faster and more effectively. The portal has administration tools and a simple user interface, along with easy-to-use registration and entitlement capabilities. The result? You can have your employees up and learning, quickly and efficiently. Once registered, learners simply enter a provided user name and password which allows them access to all their registered courses within the specified content library. Learners may log on and off, returning to the course as many times as they need, within the time frame set by the administrator. Information on learners' progress is tracked within the LMS and provided through basic reports or data feeds.

The Baseline package allows learners access to one standards-based content library (such as our own "CFO University"), accessible through a preloaded and searchable online catalog.

*DELIVERING  
MISSION CRITICAL  
CONTENT WHEN  
AND WHERE YOU  
NEED IT!*

### THE ACS CONTENT PORTAL IS BUSINESS-READY IN JUST 4 WEEKS!

The ACS Content Portal is a lean client solution, ready to use in days. It's sophisticated enough to meet the demands of the tightest regulatory environment, but robust enough to handle any content load you need. Need content too? ACS offers more than 700 standards-compliant courses in the areas of finance, business, regulatory compliance, computer, and specialty skills. Each course is learner-paced and designed for web delivery. Modular courses allow for integration of content objects and assessments, portability, and scalability. Your ACS Content Portal comes with any of these libraries fully loaded and accessible, at a clear, consistent cost per user, per course pricing.

The IXP Content Portal is part of an integrated end-to-end learning technology platform and services offering designed to grow and scale as your business needs change. The Content Portal features access to a turnkey, business-ready library of content.

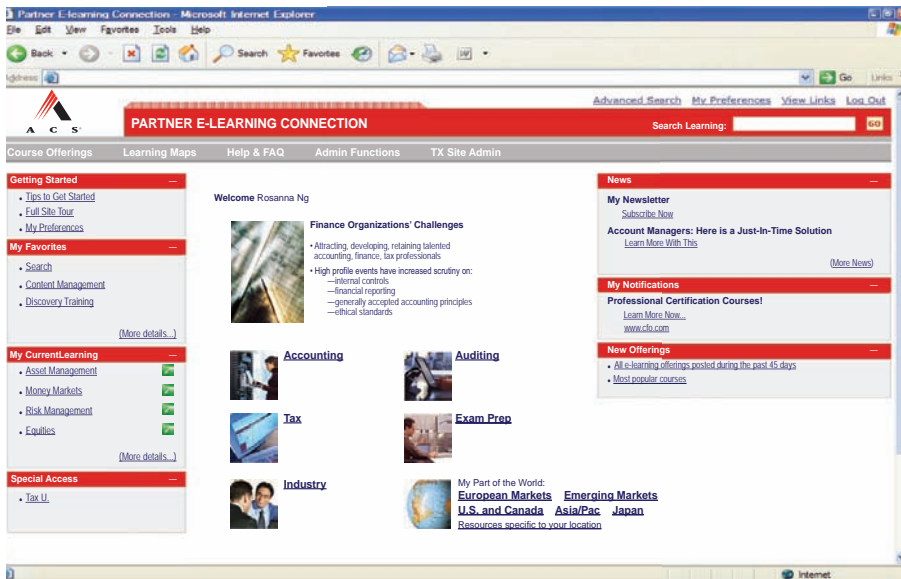

- Designated content available to the learner's desktop without individual configuration
- System delivers, tracks, manages, and reports on course consumption and completions
- Provides a consistent learning experience at a predictable, low-cost rate

Best-in-class operational excellence and managed services support provided by ACS.

- ASP infrastructure and delivery support
- Governance and reporting services
- Optional ACS Library content
- Unrivalled experience—ACS supports more than three million users every year

expertise in action™

The IXP Content Portal provides value through a predictable, acceptable subscription pricing model. It allows you to deliver, track, manage and report on course consumption and completions without expensive and extensive software and hardware configuration. ACS supports a common role-based security model, accessing a 100% web-based application, with central, unified administration that includes core learning management functionality, reporting and tracking, and configuration. Dedicated services utilize a proprietary tracking system to support personnel and to manage issue resolution, customization requests, and client feedback, with proprietary access to the system to view issue status and resolutions in real time.

## TECHNICAL REQUIREMENTS

**Disk Space:** 3MB or more of free space

**Display Settings:** 800 x 600 resolution or higher

**Operating System:** Microsoft Windows 98, Windows NT 4.0 SP6a, Windows 2000 Pro SP2, SP3, SP4 or Windows XP Pro 5.1 SP1 and SP2
