ACS Named to Top 20 in Training Outsourcing Industry for Five Consecutive Years

DALLAS, TEXAS: July 14, 2008 – Affiliated Computer Services, Inc. (NYSE: ACS) has been named to the Top 20 companies list in the training outsourcing industry by TrainingOutsourcing.com for the fifth consecutive year.

TrainingOutsourcing.com, a leading analyst firm in the learning business process outsourcing (BPO) industry, publishes the list each year to provide corporate, government and training executives with a directory of those companies that are best suited for world-class outsourcing engagements. This year, special emphasis was placed on recognizing companies with capabilities, resources and experience in providing international learning services. The 2008 selection committee also stressed the importance of innovative methods in learning analytics and evaluation methods used to assess the impact of learning on business performance.

ACS' distinctive track record, blue-chip customer base and its pioneering achievements in learning business process outsourcing were key factors in its inclusion on the Top 20 list for 2008 and the previous four years.

“ACS continues to grow and impress the market as an important member of a very elite group of learning BPO providers,” said Doug Harward, chief executive officer, TrainingOutsourcing.com. “ACS is well positioned for continued growth in the learning BPO space through expansion of service areas, innovation in delivery processes and new customers. 2008 has proven to be a banner year for ACS, winning many new clients. I expect to see the company continue to emerge as a dominant force in the training outsourcing industry in the next few years.”

Companies considered for the list were assessed by experience in managing multi-year training BPO engagements, capabilities in delivering multiple BPO training services, revenue generated from training BPO services, and potential for growth and innovation in training BPO services.

“We are again honored to be included on the Top 20 list, now for the fifth consecutive year,” said Richard Klingshirn, executive managing director, ACS Learning Services. “We continue to demonstrate our commitment to building and operating high quality, effective learning and performance driven solutions that allow our clients to enhance the value of their talent. This commitment, coupled with our emphasis on client service, has set us apart among learning outsourcing service providers.”

ACS’ learning outsourcing services span the entire learning life cycle from talent management and learning strategy, to curriculum design and development services, to complete learning process outsourcing services, including a world-class hosted learning management system and related managed administration, learner care, and support services. ACS is among a small group of providers who truly possess the capability to provide end to end learning outsourcing services either on a stand alone basis or in connection with its broader human capital management outsourcing services.
