**ACS Shares 3-D/Virtual Learning: Experiences “From the Field”
At the Masie Learning 2008 Conference**

DALLAS, TEXAS: Oct. 24, 2008 – Affiliated Computer Services, Inc. (ACS) today announced that it will sponsor and speak at this year’s Learning 2008 Conference. ACS will participate in a panel on how organizations are using 3D environments as a part of a blended learning strategy to optimize performance through learning.

Learning 2008, which is being held October 26–29 in Orlando, will be a unique gathering of learning colleagues from around the world, designed by and for learning implementers. One of the themes is how to embrace the future while being realistic about the difference between “hype” and effectiveness.

“ACS is a leading provider of integrated learning solutions, and we are proud to be associated with this premier event,” stated Richard Klingshirn, executive managing director of ACS. “We are especially proud to share with our learning colleagues our practical guidance, approaches, tips and methods for developing, contracting and implementing successful blended learning strategies. We applaud Elliot Masie for continuing to provide a venue that showcases both new and established practices in learning and creating an environment for sharing vital knowledge for the benefit of the industry.”

Caroline Avey, from the ACS Learning strategy team, will participate in the panel with other learning leaders to discuss the promise of 3-D and virtual world platforms as part of a broader blended learning strategy. The panelists will engage in candid conversation about their virtual world aspirations and realities and lessons they have learned along the way. They will share their practical experiences and what they see as benefits and pitfalls of 3-D Learning in terms of gaining buy-in from C-level executives for corporate 3-D Learning projects. Panelists also will discuss tips and tricks from the field about how to overcome typical implementation challenges and brainstorm and debate the future of virtual worlds and 3-D Learning.

ACS’ Learning Outsourcing solutions span the entire learning life cycle. The company offers talent management and learning outsourcing services, which include strategy, curriculum design and development, a world-class hosted learning management system and related managed administration, sourcing and support services.

ACS, a global FORTUNE 500 company with 62,000 people supporting client operations reaching more than 100 countries, provides business process outsourcing and information technology solutions to world-class commercial and government clients. The company's Class A common stock trades on the New York Stock Exchange under the symbol "ACS." Learn more about ACS at www.acs-inc.com.
